

# Honda Aircraft

## HondaJet

As the factory-authorized training provider for Honda Aircraft, FlightSafety offers type-specific, simulator-based training for the HondaJet. Customers benefit from the close working relationship and a shared emphasis on safety. The Honda Learning Center is located in Greensboro, North Carolina, on the Honda Aircraft Company Campus.

# HondaJet Program Highlights

- HondaJet Level D Flight Simulator for initial and recurrent pilot training
- Training with high-resolution VITAL 1100 visual system for realistic imagery and environmental conditions
- Flexible training dates to accommodate our Customers' needs
- Online scheduling at [flightsafety.com](https://flightsafety.com)
- Graphical Flight-deck Simulators (GFS) for HondaJet systems integration training
- Pre-course study materials available through [myFlightSafety.com](https://myflightsafety.com) and on FlightBag, FlightSafety's iPad app
- General HondaJet maintenance training meeting FAA and EASA (B1 and B2) requirements available at FlightSafety's Learning Center in Greensboro, North Carolina
- Supplemental engine (Honeywell TFE731) and G3000 avionics systems training also offered
