

*Comprehensive Training for Gulfstream Aircraft Technicians*

*Total Technical Training emerged from the long, close working relationship between Gulfstream Aerospace and FlightSafety International. This advanced, hands-on aircraft maintenance training program leverages Gulfstream's knowledge of aircraft design, manufacture and support with FlightSafety's world-class training expertise. Triple T employs a variety of methods and training devices to reinforce classroom knowledge and ensure that technicians return fully prepared to keep their aircraft safe and available for dispatch. In a program unique to FlightSafety, instructors from both companies collaborate to teach the multiple layers of instruction that constitute each course.*

Instruction  
Designed to Provide  
Proficiency and  
Dispatch Reliability

## Enhanced Reliability

Triple T is so effective, Gulfstream relies on the TTT team to train its own customer maintenance technicians as well as product support and General Dynamics Aviation Services personnel. The training has resulted in greater standardization of maintenance practices in the field as well as improved aircraft reliability.

## Experienced Instructors

Our instructors average nearly three decades of maintenance experience. Handpicked from service and manufacturing areas, they draw on lessons learned in the field. As with all FlightSafety courses, our instructors leverage their knowledge to lead scenario-based training designed to ensure the level of proficiency required to maintain technologically advanced Gulfstream aircraft.

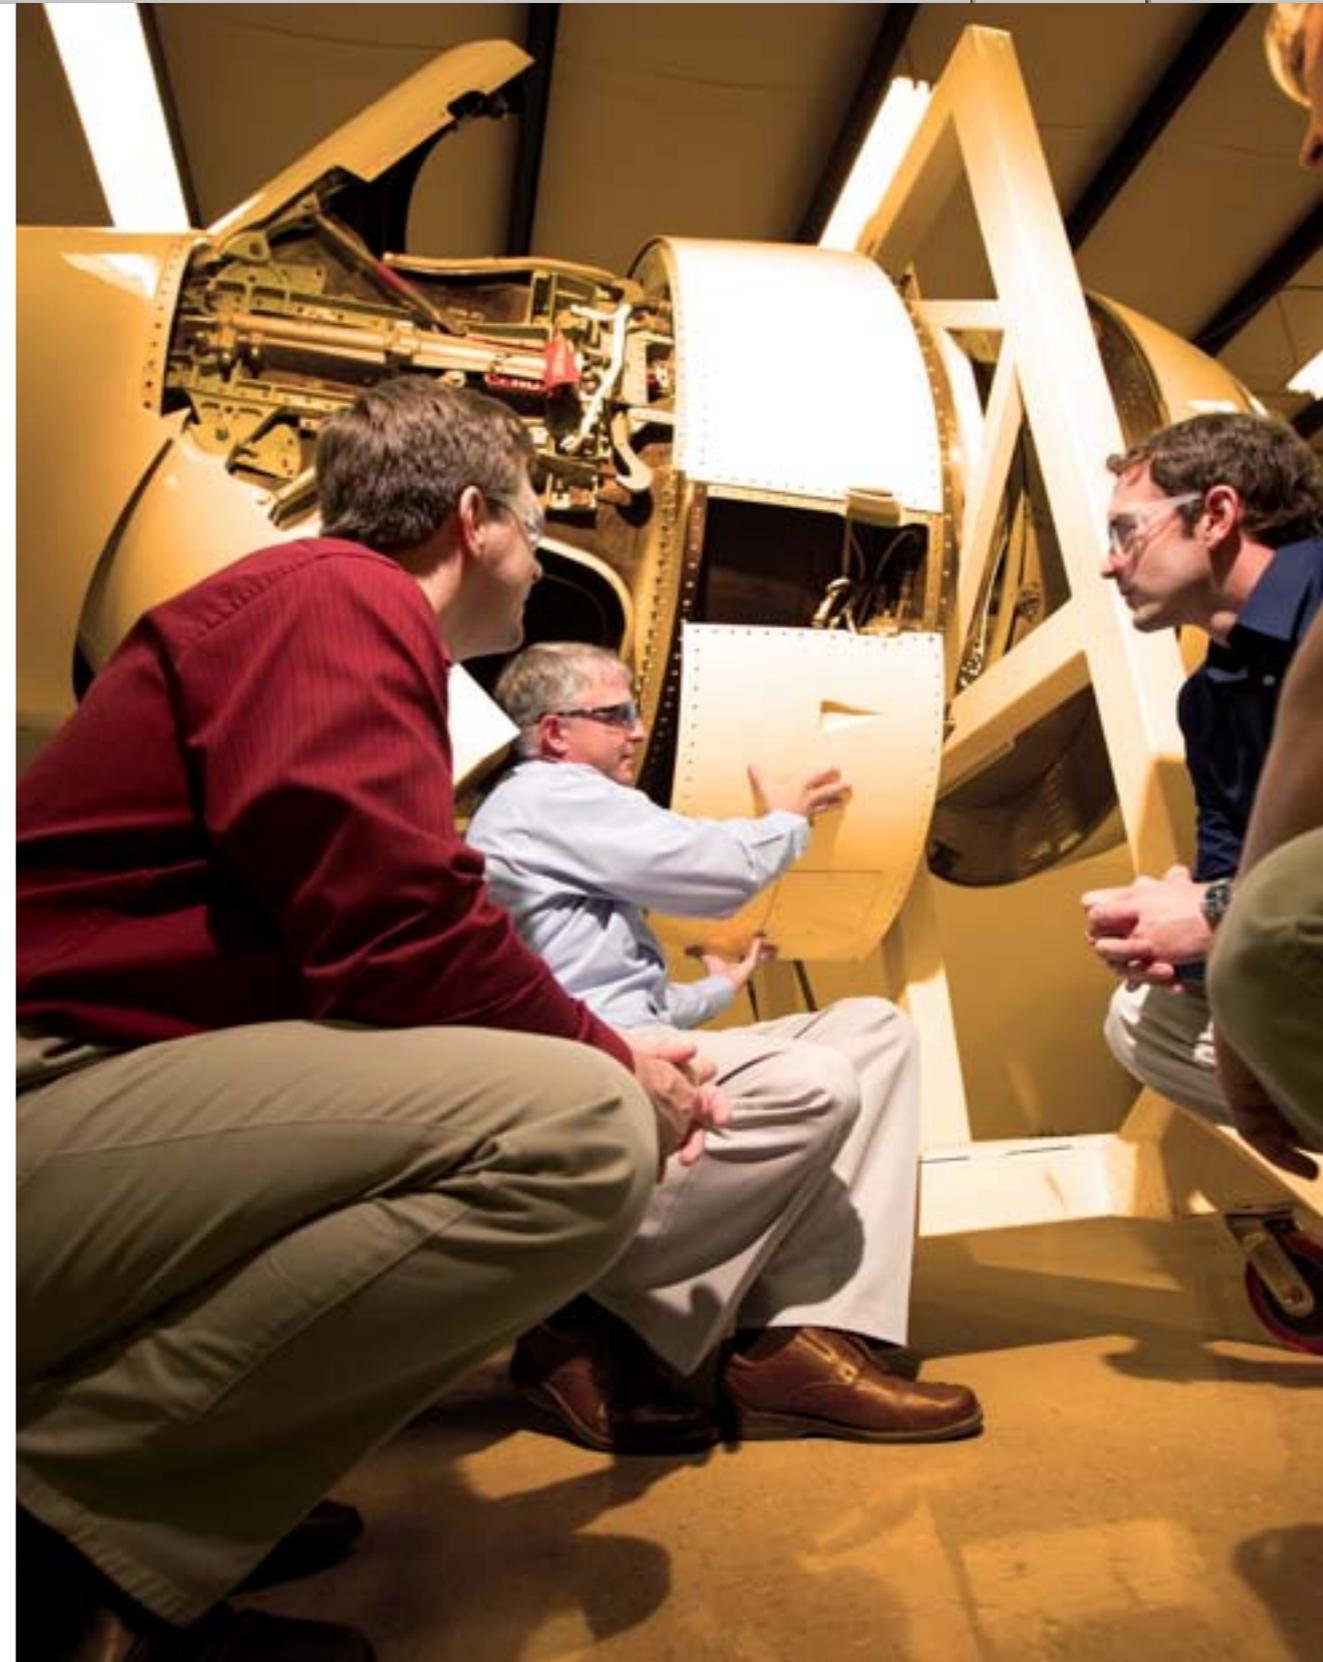

## Real-Life Scenarios

But these scenarios aren't mere theory. Triple T immerses technicians in a learning environment specifically designed to replicate real-life service issues and events. Aircraft system instruction is reinforced by walking through actual problems being experienced by operators.

## Three Centers of TTT Excellence

Triple T originated at our Savannah Learning Center, located adjacent to Gulfstream's primary manufacturing and service facilities. Demand for the training prompted us to expand course offerings and locations. It is now also offered at our Dallas/Fort Worth Learning Center and at our Long Beach Learning Center.

# Gulfstream Models Covered by Total Technical Training

## Dallas/Fort Worth Learning Center

- GIII
- G150
- GIV/G300/G400
- G200
- G100
- G280
