## FLIGHT SAFETY

## Master Technician – Avionics

You've worked hard to gain the knowledge and skills you need to be a valued member of your flight department. Take the next step with this FlightSafety training program, designed for the maintenance professional who wants to do more and achieve more. Based on our popular Master Technician training program, Avionics training builds on your proven technical abilities with training in skills that would otherwise take years to acquire – making you even more of an asset to your organization.

### Five Steps to a More Promising Career

Our progressive curriculum follows a five-step process ensuring that you receive instruction on all the skills necessary to become a Master Technician with an Avionics focus. To earn the Master Technician – Avionics certificate, complete five courses, which include mandatory core courses and electives.

### High Standards

A knowledgeable, motivated technician benefits all aspects of your operation.

- Improved safety
- Lower operational costs
- Increased aircraft dispatch reliability

### Benefits

Join more than 3,000 Master Technicians worldwide.

Here are a few of the advantages.

- Industry, employer/employee and peer recognition
- Technical expertise; professional/personal development
- Greater asset to your maintenance department
- Ability to respond to the growing number of employment ads that specify a Master Technician
- Continue your Master Technician path with additional certificates

### Multiple Master Technician Certificates

Once you've earned a Master Technician certificate, you can continue to expand both your skill sets and your career possibilities with additional Master Technician certificates.

### Mandatory

All candidates for Master Technician – Avionics must complete the following:

- Aircraft-Specific Avionics
- Aircraft Electronic Technician (AET) Course
- Avionics Standard Practices

### Electives

Choose any two of these courses. Additional courses may be available.

- Avionics Operational Maintenance Procedures
- Avionics Advanced Troubleshooter
- Avionics Practical Training (5- or 10-day course)
- NAV/Com
- Autopilot
- Cabin Communications
- Aero IT

### Additional Master Technician Programs

- Airframe: Aircraft-Specific
- Composites: Repair and Fabrication
- Engine: In-depth, Engine-Specific
- Management: Career Advancement
