

Master Technician

FLIGHT SAFETY

Master Technician – Management

You've worked hard to gain the knowledge and skills you need to be a valued member of your flight department. Take the next step with this FlightSafety training program, designed to help advance your career. Based on our popular Master Technician training program, Management training provides you with the skills you need to interact effectively with customers, managers and co-workers, preparing you for additional responsibilities or a management position. Some course offerings are in conjunction with Global Jet Services or ServiceElements.

Five Steps to a More Promising Career

Our progressive curriculum follows a five-step process ensuring that you receive instruction on all the skills necessary to become a Master Technician with a Management focus. To earn your Master Technician – Management medallion and certificate, complete five courses, which include mandatory core courses and electives.

High Standards

A knowledgeable, motivated technician benefits all aspects of your operation.

- Improved safety
- Lower operational costs
- Increased aircraft dispatch reliability

Benefits

Join more than 3,000 Master Technicians worldwide. Here are a few of the advantages.

- Industry, employer/employee and peer recognition
- Technical expertise; professional/personal development
- Greater asset to your maintenance department
- Ability to respond to the growing number of employment ads that specify a Master Technician
- Continue your Master Technician path with additional certificates

Multiple Master Technician Certificates

Once you've earned a Master Technician certificate, you can continue to expand both your skill sets and your career possibilities with additional Master Technician certificates.

Mandatory

All candidates must complete the following:

- Aircraft-Specific Initial, Familiarization or Update Course
- Aviation Maintenance Manager Program (AMMP) or Aviation Interpersonal Maintenance Management (AIMM)

Electives

Choose any three of these courses.

- FARs for AMTs
- FAR Part 145 Repair Station Training
- Human Factors
- Maintenance Resource Management (MRM)
- OSHA/EPA Training
- Safety Management Systems (SMS)
- Project Management for the Aviation Professional
- Some eLearning Courses are also acceptable.

Note, only one can be used as an elective.

Additional Master Technician Programs

- Airframe: Aircraft-Specific
- Avionics: Aircraft-Specific
- Composites: Repair and Fabrication
- Engine: In-depth, Engine-Specific
