

PROFESSIONAL AVIATION MAINTENANCE TRAINING

# Travel Safety and Security

*Course Information*

**Course Description – 2 Day Course**

SKYDAS Group, in cooperation with FlightSafety International is pleased to offer an Abduction Prevention course. A fast paced 2-day training, program, with heavy emphasis placed on the practical applications learning occurs when an emotional and/or physical response is elicited from the student. The course will teach you how to recognize the pre-incident indicators that are always present just prior to any attack. Most importantly, we give our students the core skill sets needed to prevent or significantly deter hostiles from targeting them whether they are home or abroad. The course culminates in a field exercise in which the students are required to defeat a simulated kidnapping/assault attempt. To accomplish this, you will need to discover technical surveillance devices, effectively lose a mobile surveillance team and avoid static surveillance points.

FlightSafety Material Number ..... 306869

**Ground School Course Modules Hours**

Extremist and criminal methodology	
Travel pre-planning and check lists	
Types of surveillance	
The attack cycle	
Surveillance detection skills	
Personal defense/combatative	
Escaping restraints	
Information security	
Surveillance detection routes and surveillance cleaning routes	
Surveillance point recognition	
Security checkpoints abroad	
Driving while abroad/evasive maneuvers	
Airport security	
Hotel safety	
Cover stories	
Home and Family security while you are away	
<b>Ground School Training Hours .....</b>	<b>14.00</b>

**Academic Course Modules Hours**

Welcome/Introduction.....	1.00
Practical Applications .....	3.25
Review/Exam .....	0.25
*Based upon availability and course schedule.	
<b>Total Hours.....</b>	<b>18.50</b>

**Approvals and Limitations**
