

PROFESSIONAL AVIATION TRAINING

Resource Management for UAS Operations – eLearning

Course Information

This course helps UAS pilots become familiar with the human challenges of remote pilot operations. While Resource Management is increasingly understood and standards are increasingly regulated in the aviation industry, the human limitations and learnings are just as applicable to remote pilots.

Remote pilots will become aware of strategies can be used to:

- optimally manage resources
- minimize risk
- optimize performance
- improve overall flight safety

After successfully completing the course and passing the examination, you are issued a Certificate of Completion.

To enroll in this course, please contact eLearning Operations at 877-606-3334 or 416-373-5771.

For more information please visit <https://elearning.flightsafety.com/ust-resource-management.html>

Course Curriculum	2.5 Hours
This self-paced course covers the following topics:	
<ul style="list-style-type: none">• Challenges facing the remote pilot• Definition of Remote-pilot Resource Management• Self-monitoring• Resilience• Workload management• Stress management• Fatigue management• Communication	<ul style="list-style-type: none">• Attention/Event management• Situation awareness• CFIT avoidance• Automation management• Standard operating procedures• Threat and error management• Risk assessment• Decision making• Examination
