The Greatest Value in Unmanned Systems Training

Your Most Trusted Safety Partner

Customers choose FlightSafety for our unequaled experience, master instructors and advanced-technology training devices. But they return for the consistent value they receive in every safety-focused training program we offer. At each of our numerous locations that span the globe, Customers know they're trained by experts, and assisted by FlightSafety teammates who go above and beyond to ensure the best possible experience with unmatched service and support.

Industry-Leading Unmanned Systems Training

FlightSafety, using nearly seven decades of industry-leading aviation training expertise, is training professional aviators in Unmanned Systems. Courses focused on standards, safety and proficiency are designed to meet the needs of a wide range of operators and pilots. We have worked in conjunction with Praxis Aerospace Concepts to develop and deliver some of these courses, with more in development. Based upon our experience with unmanned training for the military, we have built our program to ASTM International Standards, AUVSI TOP 3, industry requirements and the specific needs of commercial and government operators.

A Legacy Built on Trust

FlightSafety International views safety as a promise and commitment. We build trust over time and continue to earn it each day. Since our founding in 1951, our instructors, engineers, technicians and team members have greatly contributed to aviation safety around the world. Aviation professionals have put their trust in us for almost seven decades. We earn that daily through ongoing technological innovations and a dedication to enhancing safety.

Customers Always Come First

Customers recognize our many advantages, including delivering the highest-quality training and outstanding service. We build on that foundation with our dedication to safety, experienced instructors, training effectiveness, and advanced-technology training systems. Our commitment to train to proficiency goes well beyond minimum requirements. We never rest in making our already industry-leading training even better, offering unmatched advanced courses and instruction tailored to specific needs. That adds up to the greatest value in aviation training.

Our Comprehensive Curriculum

We offer a variety of courses delivered online as well as traditional classroom and hands-on training.

Online Courses

- 107 Familiarization Course (ASTM Section 5 F3266 and Part 107 Written Test Prep)
- Battery Basics for UAS Operations Course
- Fatigue Management for UAS Operations Course
- Resource Management for UAS Operations Course
- SMS for UAS Operations Course
- Weather for UAS Operations Course
- Basic Photography for UAS Course
- Advanced Photography for UAS Course

Classroom Instructor-Led Training

Advanced Remote Pilot Training Series Courses

– Professional Remote Pilot Fundamentals

– UAS Standards Instructor Fundamentals

– Advanced Mapping for UAS Operations

– Inspection Fundamentals for UAS Operations

Workshops

SMS for UAS Managers (2-Day Workshop with SMS Manual Template)

Custom Courses

Custom courses for specific missions, environments and aircraft can be created.

More courses available each month. View the current list of courses at flightsafety.com

Program Highlights

- Designed for a wide range of users, from no prior experience to seasoned operators.

- Built upon FlightSafety's experience with unmanned, simulator-based training for military agencies.

- Developed by a team of advanced courseware engineers and developers alongside leading industry professionals as subject matter experts.

- Taught by highly qualified and experienced instructors.

- Delivered at several Learning Centers as well as online and at Customer facilities.

- Meets FAA, ASTM International, AUVSI TOP 3 Operator, other national aviation authority, regulatory and industry-specific authority standards.

- Many courses are designed for operators of all different commercial drones.

- Courses designed to provide an avenue from start to finish for careers in commercial unmanned platforms.

- Standards, safety and proficiency are the focus of each of our courses.

- Courses for remote piloting, maintenance and managing UAS flight departments.
