

Falcon 900 Operational Maintenance Procedures

Course Information

Course Description – 5 Day Course

This course represents the final step in attaining FlightSafety's Master Technician certification. It challenges all skills and training developed throughout an aircraft technician's career.

Training includes extensive troubleshooting and fault analysis. The training scenarios presented stimulate logical thinking and utilization of resource management with the goal of arriving at the best solution and/or corrective action. Participants are accepted on an individual basis prior to attending.

FlightSafety Material Number 304521
