

PROFESSIONAL AVIATION MAINTENANCE TRAINING

Falcon 900EX Engine Run & Taxi

Course Information

Course Description – 1 Day Course

This course is appropriate for Maintenance Technicians who may be required to taxi and perform engine parameter checks on the (Aircraft Name) aircraft. The course consists of three modules, Standardized, Aircraft Specific and Simulator training that cover normal, abnormal and emergency procedures.

The course can be taken as a standalone but it is recommended that it be taken during or as a follow up to a Maintenance Initial, Update or Troubleshooting course.

Completion of the program ensures enhanced safety during engine run-up and taxiing, and a heightened level of system knowledge.

FlightSafety does not provide client approval to complete engine runs or taxi. These approvals should be received from the client's company.

FlightSafety Material Number 304340

STANDARDIZED MODULE

Ground School Course Modules Hours

Airport Signs and Markings2.00
