

# Gulfstream GIV/G300/G400 Advanced Troubleshooting

## Course Information

### Course Description – 5 Day Course

FlightSafety's GIV/G300/G400 Advanced Troubleshooter System (ATS) is a classroom application that allows the maintenance technician the ability to troubleshoot aircraft down to the component level.

Technicians will view system malfunctions in a real-time cockpit environment based on real-world scenarios. Each troubleshooting scenario immerses the technician into the simulation with all the cockpit indications, diagnostic tools (CMC / MDC) and maintenance publications that would normally be available if the technician was troubleshooting the actual aircraft.

The ATS program also incorporates FlightSafety's "Four Step Process" philosophy of troubleshooting which provides a logical step by step approach and is the core to every troubleshooting scenario

FlightSafety Material Number ..... 303574

### Ground School Course Modules Hours

Troubleshooting Review .....	3.00
Aircraft Troubleshooting Scenarios .....	28.00
<b>Ground School Training Hours .....</b>	<b>31.00</b>

### Academic Course Modules Hours

Welcome/Introduction.....	1.00
Review/Exam .....	1.00
<b>Academic Training Hours .....</b>	<b>2.00</b>

**Total Hours..... 33.00**

### Approvals and Limitations

**FAA IA renewal Accepted**  
Accredited for IA refresher training under Title 14 CFR part 65, § 65.93(a)(4)
