ATP Training – The ATP Initial will include two additional days of training (with increased hours of training) and the ATP Check will have additional fees.

Operational Day Flow (ODF) Training Available in Recurrent Course – Operational Day Flow is the innovative next step in FlightSafety’s approach to delivering Pilot Training. FlightSafety has redesigned its ground school courseware, based on aircraft performance and range, into operationally based scenarios organized by phase of flight. The result is an enhanced, interactive, hands-on learning experience with multiple benefits.

Systems Integration Training – This is the integration of CRM principles, flight briefing, and aircraft systems checklist procedures.

Additional Training Options – FAR 135 training is available based on company approval.

Maintenance Training – Maintenance Training, including Pratt & Whitney Canada Engine Training is also available for this aircraft.

Course Dates - Please visit our website at www.flightsafetytextronaviationtraining.com or contact the Learning Center listed below.
