

Pratt & Whitney Canada

Enhanced Training for the Full Range of Engines and APU/APS

Engines: JT15 Series | PT6A, B, C, E Series | Twin-Pac[®] Series | PW100 Series | PW200 Series
PW300 Series | PW500 Series | PW600 Series | PW800 Series

APUs: APS500 | APS1000 | APS2000 | APS2100
APS2300/2600 | APS3200 | APS5000 | PW901 | PW980

Elevate your engine knowledge to the next level, thanks to a collaborative agreement between Pratt & Whitney Canada and FlightSafety International. This agreement leverages FlightSafety's six decades of training mastery, worldwide Learning Center network, and the expertise offered by experienced, highly qualified instructors to deliver more courses with greater frequency at more locations than ever before. The result: industry-leading maintenance training that meets or exceeds worldwide regulatory requirements for the full range of engines – including turboprop, turbofan and turboshaft – and the full range of APU/APS.

Pratt & Whitney Canada Training Program Highlights

- We work closely with Pratt & Whitney Canada to keep information up-to-date, incorporating latest best practices and extensive field experience.
- Take advantage of access to both airframe and engine training at the same FlightSafety location.
- FlightSafety/Pratt & Whitney Canada maintenance training meets or exceeds international regulatory standards and is approved under most regulatory agencies worldwide.
- We are pleased to offer our progressive five-step Master Technician program with an Engine focus for many of the Pratt & Whitney Canada Turboprop, Turbofan and Turboshaft engine training programs.
- Reinforce classroom knowledge through hands-on instruction designed to develop, expand and refine proficiency.
 - Full-scale systems trainers
 - Maintenance task simulators
 - Wide variety of test equipment
 - Major component cutaways
 - Working models
- In addition to Learning Center and online instruction, we can provide training at your location.
- Our partnership leverages Pratt & Whitney Canada's expertise and FlightSafety's experience as the world's premier professional aviation training company and supplier of flight simulators, visual systems and displays to commercial, government and military organizations.
