

PROFESSIONAL AVIATION MAINTENANCE TRAINING

P&WC PW200 Series Maintenance Update

Course Information

Course Description – 2 Day Course

FlightSafety's P&WC PW200 Series Maintenance Update Training Course meets the training requirements of technicians / engineers with actual experience on the specific engine. System Reviews are provided on an as-needed-basis, as indicated by the specific clients.

The latest Service Information Letters and Service Bulletins are reviewed and stressed.

The technician will be required to utilize technical data as well as recall major system and sub-system normal operations, ground handling, safety precautions, and system self-test procedures.

Technicians attending the update course should have previously completed an initial Line and Base maintenance course and be familiar with the day to day operation of the engine.

FlightSafety Material Number306987
