Gulfstream G650 LiveLearning Recurrent Pilot Training

Course Information

This FAA approved course is designed to save time away from home by replacing the traditional two-day ground school conducted at the Learning Center with a 16-hour LiveLearning recurrent ground school. This course is also suitable for EASA operators.

The pilot will have 90 days from the completion of the LiveLearning Ground School to complete the required validation examination. If either letter of authorization is expired when the pilot arrives at the center, he/she will be re-scheduled for the prerequisite training at the next available opportunity.
