**ATP Check Ride – Available during Initial Training and Prior Experience training upon request.**

**Prerequisites** - Pilot must hold a valid instrument rating and multiengine rating for course completion. Certain exceptions may apply for the multiengine rating; based on country. For questions, please contact any of the Learning Centers listed below.

**Prior Experience Course** – This course is designed for pilots who are seeking the addition of an ATP or have previous limited experience in the aircraft. **All Prior Experience Courses are scheduled upon request.**

**ATP Prerequisites** – FlightSafety is able to administer Airline Transport Certificate (ATP) Checks during the Pilot Initial and Prior Experience Course. To qualify, pilots must meet the requirements of 14CFR Part 61.155 through 61.159.

**G1000 Indoctrination Course** - The G1000 course must be completed prior to Recurrent training unless the pilot was previously qualified in the G1000 Avionics. This course utilizes the Graphical Flightdeck Simulator (GFS) and Avionics Trainer which provides the pilot with special orientation to the cockpit and active usage of Garmin G1000 avionics.

**Differences Training** – Differences Training is available to King Air 90 Series models.

**Training Materials** – Training and Pre-Course Study materials are available electronically to clients 60 days prior to scheduled training via FlightBag. Materials are updated automatically as new information becomes available, yet keeps all of your previous notes.

**Maintenance Training** – Maintenance Training, including Pratt & Whitney Canada Engine Training, is also available for this aircraft.

**Course Dates** - For course dates, please visit our website at [www.flightsafetytextronaviationtraining.com](http://www.flightsafetytextronaviationtraining.com) or contact any of the Learning Centers listed below.
