

Course Description – 10 Day Course

This course is designed to meet the training requirements of an avionics technician needing to maintain Citation 500/550/560 Series aircraft.

This course provides in-depth training for the electrical and avionics system as well as familiarization training for standard aircraft systems.

To enhance retention of information learned in the classroom, specialized training materials and OEM technical data are used. This course prepares the learner to perform system, engine, component, and functional checks and to correlate this information for decision-making as well as Return to Service.
