

Course Description – 5 Day Course

FlightSafety's Cessna 560XL/XLS Advanced Troubleshooter System (ATS) is a classroom application that allows the maintenance technician the ability to troubleshoot aircraft down to the component level.

Technicians will view system malfunctions in a real-time cockpit environment based on real-world scenarios. Each troubleshooting scenario immerses the technician into the simulation with all the cockpit indications, diagnostic tools (CMC / MDC) and maintenance publications that would normally be available if the technician was troubleshooting the actual aircraft.

The ATS program also incorporates FlightSafety's "Four Step Process" philosophy of troubleshooting which provides a logical step by step approach and is the core to every troubleshooting scenario

FlightSafety Material Number303594

Ground School Course Module Hours

| | |
|---|--------------|
| Troubleshooting Review | 3.00 |
| Aircraft Troubleshooting Scenarios | 28.00 |
| Ground School Training Hours | 31.00 |

Course Modules

| | |
|--------------------------------------|-------------|
| Welcome/Introduction..... | 1.00 |
| Review/Exam | 1.00 |
| Academic Training Hours | 2.00 |

Total Hours..... 33.00

Approvals and Limitations

FAA IA renewal Accepted
Accredited for IA refresher training under Title 14 CFR part 65, § 65.93(a)(4)
