

PROFESSIONAL AVIATION MAINTENANCE TRAINING

Pilatus PC-24 (Williams FJ44) Maintenance Update Training

In-Center or Online Instructor-led LiveLearning®

Course Information

Course Description – 5 Day Course

This course meets the training requirements of technicians/engineers with actual experience on the Pilatus PC-24. System Reviews are provided on an as-needed-basis, as indicated by the specific clients.

The latest service information and operational aspects of a safe and efficient dispatch of the aircraft are reviewed and stressed. The technician/engineer will be required to utilize technical data as well as recall major system and sub-system normal operations, ground handling, safety precautions, and system self-test procedures.

Technicians/engineers attending the update course should have previously completed an initial maintenance course and be familiar with the day to day operation of the airframe, engine and avionics systems.
